

# Handicare Simple Solutions

Footstool

Return 7500i

SOLUTIONS

Many of our products are designed to work together to solve problems in the clinical setting. Pair the Footstool and the Return 7500i to help with:

- High beds (specialty beds) which don't lower enough to allow a patient's feet to hit the floor
- High fixed tables (Clinic, radiology, diagnostic and procedural areas) and patients needing transfer assistance

Improve safety and assist patients up and down without a dangerous step stool or manual lifting with this *SIMPLE SOLUTION*
